

Wyse® E01™ zero client

New shared desktops for
compact classroom computing

Fact sheet

WYSE
| | | |

Low cost shared desktops for high performance learning.

Wyse E01 zero clients enable you share one PC with up to 10 students. Their innovative design has been specifically created to work with new Microsoft Multipoint Server 2010. They're designed to deliver you dramatically lower IT costs per student desktop, while increasing the availability, convenience and manageability of your classroom computing investment.

In just the time it takes to plug your Wyse E01 zero clients into your PC running Windows Multipoint Server 2010, your students can be benefiting from the very latest high performance Windows 7 learning desktops.

All round benefits. For your students, administrators and you.

- **More desktops, for more students:** Up to 10 students are able to access a single PC running Windows Multipoint Server 2010 with no drop in their learning experience.
- **Easy to use and add students:** As a teacher you'll appreciate the simple plug-n-play nature of Wyse E01 zero clients. For additional desktops all you do is plug one into the server, and your students can login and be ready to learn in seconds.
- **Lower operational costs:** Schools only need to service and support one PC per 10-seat workgroup. And, combined with the easy set-up and management that's built into Windows MultiPoint Server 2010, student desktop down-time and support issues are all significantly reduced too.
- **Energy-efficient desktops:** As Wyse E01 zero clients draw a fraction of the power required to power full PC desktops, they'll have a dramatic effect on your energy budget as well helping to reduce your carbon footprint too.

At a glance:

Benefits

- Designing for sharing a single PC.
- Rich Windows 7 experience for classrooms.
- Small footprint allows more desktops per classroom.
- Reduced hardware costs to help IT budgets.
- Reduced computer updates and maintenance.
- Energy efficient - as devices consume less than 3w of power.

Connects to the server through USB

- No local area network connectivity.
- Passive USB to VGA port replication.

Supports USB peripherals

- Keyboard.
- Mouse.
- Flash devices.
- Other USB peripherals.
